DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2-7, 10, 14-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Naoi (US 6,168,442) in view of Betroncini (US 6,184, 460).

Regarding claims 2-7, 10, 14-18, Naoi, fig. 1-11, discloses all the limitations (see previous none final office action) except plurality of cylindrical conductive parts for high-frequency shielding arranged to surround each of the conductive parts. Betroncini, fig. 1-5 (column 3, lines 65, column 4, lines 1-10, column 4, lines 33-57), discloses plurality of cylindrical conductive parts 52 for high-frequency shielding arranged to surround each of the conductive parts 56. At the time the invention was made, it would have been to a person of ordinary skill in the art to provide Naoi's anisotropically conductive connector with Betroncini's plurality of cylindrical conductive parts for high-frequency shielding arranged to surround each of the conductive parts for connection and extending in the thickness-wise direction in the elastic anisotropically conductive film, in order to shield the signal conductors.

Regarding claim 19, Naoi and Betroncini disclose an electrical inspection apparatus for circuit devices, which comprises the anisotropically conductive connector according to claim.

Regarding claim 20, Naoi and Betroncini disclose an electrical inspection apparatus for circuit devices, which comprises the anisotropically conductive connector according to claim 15.

Response to Arguments

3. Applicant's arguments with respect to claims 2-7, 10, 14-20 have been considered but are moot in view of the new ground of rejection.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
